ALI FAIZAN MEHMOOD

Mobile Application Developer · Android · iOS · Cross-Platform

alifaizanmehmood05@gmail.com | +92 328 093 0424 | LinkedIn | Ozeito Pvt. Ltd.

PROFESSIONAL SUMMARY

Dedicated Mobile Application Developer with 4+ years of hands-on experience building and shipping production-grade Android, iOS, and cross-platform applications. Started from zero with Kotlin & XML in July 2022 and progressed through Jetpack Compose, Kotlin Multiplatform (KMP), and Flutter. Published apps on both the Google Play Store and Apple App Store, with expertise spanning real-time Firebase integrations, AI/ML features, in-app subscriptions (Google Play Billing), REST APIs, and UI/UX implementation. Currently employed as a developer at Ozeito Pvt. Ltd. and actively expanding cross-platform skills.

TECHNICAL SKILLS

Kotlin (XML) · Jetpack Compose · KMP · Flutter / Dart · Firebase · REST APIs · Google Play Billing · ML Kit

Languages: Kotlin, Dart, XML

Frameworks: Jetpack Compose, Kotlin Multiplatform (KMP), Flutter

Backend / Cloud: Firebase (Realtime DB, Firestore, FCM, Auth), REST APIs

Architecture: MVVM, ViewModels, Riverpod, GetX, SharedPreferences

Tools: Android Studio, Xcode, GitHub, Google Play Console, App Store Connect

Other: Google Document Scanner, ML Kit, In-App Purchases, App Localization, Canvas / Drawing APIs

WORK EXPERIENCE

Mobile Application Developer — Ozeito Pvt. Ltd. 2022 – Present

- Developing and maintaining Android, iOS, and cross-platform applications for clients.
- Delivered 13+ production apps across Kotlin (XML), Jetpack Compose, KMP, and Flutter.
- Integrated Firebase services (FCM push notifications, Realtime Database, Firestore, Auth).
- Implemented Google Play Billing subscriptions and Apple App Store in-app purchases.
- Maintained full version control with GitHub; every project repository backed up and documented.
- Collaborated directly with clients to gather requirements and iterate on product features.

KEY PROJECTS

Kotlin + XML *(3 years)*

Office Boy App — *Kotlin / XML / Firebase*

- Real-time employee-to-office notification system with custom ringtones per alert type.
- Firebase Cloud Messaging (FCM) for push notifications; Firebase Realtime Chat system.

Tutor AI — *Kotlin / XML / ML Kit / AI API*

- AI-powered chat board supporting any subject (Math, Biology, multilingual questions).
- Document & question scanning via Google ML Kit with accurate AI answers returned.
- Full app localization — multiple language support implemented.

Smart Printer App — *Kotlin / XML / Google Play Billing*

- Wireless printing of images (gallery / camera), PDFs, plain text, websites, and phone contacts.
- Google Document Scanner integration; freehand Canvas with 5 pencil / brush types.
- Google Play subscription / billing integration for premium features.

Subscription Manager App — *Kotlin / XML*

- Tracks subscription sales per customer; automated renewal reminders via local notifications.
- App localization and in-app subscription support.

War Card Game — *Kotlin / XML*

- Single-player card game vs. computer with coin economy stored via SharedPreferences.

- Wheel / reward system to earn coins when balance runs out.

Jetpack Compose *(~3 months)*

Browser App — *Kotlin / Compose*
- Full-featured browser with Chrome-style tab management and incognito mode.
- Video downloader supporting YouTube and other platforms; downloaded videos shown in gallery.

Subscription Manager (Compose) — *Kotlin / Compose*
- Re-implemented subscription manager in Jetpack Compose to modernise the UI layer.

Kotlin Multiplatform (KMP) *(~2 months)*

Subscription Manager (KMP) — *KMP / Android & iOS*
- Shared business logic across Android and iOS using Kotlin Multiplatform.

Flutter *(8+ months, ongoing)*

Arvo — Campus Social Media App — *Flutter / Firebase*
- Campus-scoped social platform: users can only post / view content within their own campus.
- Friend system, real-time chat, and Firebase push notification integration.
- Designed for universities with multiple campuses to manage campus-specific activity.

Nacelle — Event Ticket Scanner — *Flutter / REST APIs*
- Event ticket management and scanning app powered entirely by REST APIs.

Baby Face Generator — *Flutter / AI APIs*
- AI-powered app that predicts a baby's appearance from parent photos via API.
- Features: age progression, custom baby generation from text prompts.

Killer Sudoku (with Daily Challenge) — *Flutter*
- Sudoku and Killer Sudoku game with daily challenges, global leaderboard, trophies, and stats.

Video Downloader App — *Flutter / (in progress)*
- Downloads videos from YouTube, X (Twitter), Facebook and more; currently under development.

EDUCATION

BS Computer Science — Government College University Faisalabad 2022 – 2026

FSc (Pre-Engineering / Math) — TIPS Group of Colleges 2019 – 2021

Matriculation (Biology) 2017 – 2019

PROFILES & ACCOUNTS

LinkedIn: linkedin.com/in/ali-faizan-mehmood-132671282

GitHub: All project repositories maintained and backed up on GitHub.

Google Play: Active developer account — apps published on the Play Store.

App Store: Active Apple developer account — apps published on iOS / macOS.

ADDITIONAL SKILLS

Typing Speed: 80 WPM (random words with letters & special characters) — maintained since 2022.

HOBBIES & INTERESTS

- Exploring and learning new technologies and programming frameworks.
- Improving typing accuracy and speed through daily practice.
- Building personal side projects to experiment with emerging tools.
